

TandIM VestiGO: Carrying the Card for the Educational Sector

CARDS FOR COLLEGES

TandIM VestiGO has established itself as a premier supplier of ID cards for schools and colleges and has a demonstrable track record of achievement in this specialist sector. Its success is based on continuously improving levels of operational efficiency and service designed to meet the specific and individual needs of its customers.

THE BRIEF

The principal requirement for schools and colleges is to provide immediate and recognisable proof of a student's status. Are they a registered student and are they entitled to be on the premises and access student benefits?

Cards must be tamper proof and reflect the logo and house style of the organisation concerned. As a rule they must also include:

- A colour photograph of the student
- The title of the student's course
- The course code
- The expiry date of the course
- Contact details

OPERATIONAL CONSIDERATIONS

TandIM VestiGO prides itself on being able to overcome challenges and obstacles by providing a bespoke solution to card production...without the need for capital investment.

Five criteria are common throughout the educational sector:

1. Because of limited funds, the reluctance or inability of schools and colleges to invest in specialist ID card equipment
2. The system must be quick and easy to use with no prior knowledge or skills required
3. The re-ordering of existing or lost cards must be simple, speedy and hassle-free
4. Cards must be completely traceable and card data readily accessible to authorised personnel

5. Staff must have complete confidence in the system and enjoy an unrivalled customer experience

THE SOLUTION

A TandIM VestiGO card production system using a standard computer offering speed and convenience of use, coupled with complete flexibility. A cost-effective, desk top answer that becomes as routine as sending an email.
